SUMMARY

Backend and AI engineer building distributed Java and Spring Boot services and the AI systems on top of them. Currently authoring benchmarks that evaluate AI coding agents on real open-source issues.

EXPERIENCE

Freelance Software Engineer | Shipd — Olympus

Aug 2026 – Present

- Convert real open-source issues into benchmark tasks for AI coding agents: reproduce the failure, author the reference patch a maintainer would ship, and derive fail-to-pass tests.
- Containerize evaluation environments with Docker so every agent run is reproducible and deterministic.
- Work across Java, Python, JavaScript, and Rust codebases.

PROJECTS

Spring Security Starter | Java, Spring Boot, Spring Security, OAuth2, Maven Central | GitHub | Maven Central

- Published to Maven Central with JWT, OAuth2 Resource Server, and Keycloak support; 4.1K+ downloads.
- Implemented refresh-token rotation with replay detection, JWT key rotation, and token revocation.

LifeLink | Java, Spring Boot, FastAPI, Kafka, Redis, PostgreSQL, React Native | GitHub

- Architected 11 microservices (9 Spring Boot, 2 FastAPI) with 188 REST endpoints using Eureka Service Discovery.
- Built event-driven services across 15 Kafka topics with gRPC and STOMP WebSockets, plus a 57-screen React Native app.

AR Car Showcase | Spring Boot, React Native, Viro React, FastAPI, Flask, OCI | Website | GitHub | APK

- Architected 3 backend services (Spring Boot, FastAPI, Flask) with 70+ REST endpoints on OCI; 1.6K+ visitors/month.
- Built a Cosine Similarity and Thompson Sampling recommender with a headless-Blender GLB generation pipeline.

OPEN SOURCE CONTRIBUTIONS

Spring AI Session | Spring AI Community | GitHub

- Engineered runtime branch isolation and scope-aware compaction for branch-specific memory management in multi-agent LLM workflows, and optimized JDBC session compaction to reduce database I/O [#29] [#33] [#36] [#37] [#38]

Dapr Quickstarts | CNCF Dapr Project | GitHub

- Implemented Multi-App Run for Java, Node.js, and Python quickstarts using declarative `dapr.yaml`, simplifying startup to `dapr run -f .` [#1290] [#1292] [#1297]

EDUCATION

J B Institute of Engineering and Technology (JBIET), Hyderabad

2022 – 2026

B.Tech in Computer Science and Engineering | CGPA: 8.34/10

HACKATHONS

Smart Innovation Hackathon 2K26 — Winner (1st Place)

Apr 2026 | JBIET (60+ teams, under SIH)

- Led the team behind a Digital Health Record System for migrant workers in Kerala, integrated with LifeLink.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, Rust, C, SQL

Frameworks: Spring Boot, Spring Security, Spring Cloud, Spring AI, FastAPI, Flask, React, React Native, LangChain

AI/ML: LLM Integration, RAG, Prompt Engineering, Embeddings, Vector Search, Hybrid Search, AI Agent Evaluation

Data/Messaging: PostgreSQL, pgvector, MySQL, Redis, Apache Kafka

Backend/Protocols & Tools: REST APIs, gRPC, WebSockets, OAuth2, JWT, JUnit, Mockito, Postman

Cloud/DevOps: AWS, Oracle Cloud Infrastructure (OCI), Docker, Git, Linux, Maven

Concepts: Distributed Systems, Microservices, Event-Driven Architecture, AI Agents, Semantic Search

DSA: 200+ LeetCode problems — Arrays, Hashing, Trees, Graphs, DP, Greedy, Binary Search

CERTIFICATIONS

- Programming in Java – (Top 1%) | Data Structures & Algorithms Using Java — NPTEL
- Oracle Cloud Infrastructure – Foundations Associate, Developer Professional, DevOps Professional, AI Foundations Associate | View Certificates
